

## Deployment Checklist – WhisperSuite (Updated)

### [OK] Prepare Build

- [x] Compile GhostKey.dll and WraithTap.exe (Release|x64)
- [x] Run BuildDeployWhisper.ps1 to package modules
- [x] Confirm polymorph mutation (GhostPolymorph) → final .dll/.exe
- [x] Optionally create ghost\_boot.iso via CreateGhostISO.ps1
- [x] Place LinuxPDF.exe + QEMU if ephemeral VM scanning is needed

### [OK] Operator Tools

- [x] Copy entire WhisperSuite\_Build to USB or Flipper Zero
- [x] Validate BLETrigger and config signing
- [x] (Optional) Confirm LinuxPDF + ghost\_boot.iso for ephemeral environment

### [OK] Pre-Engagement

- [x] Execute GhostWhisperBootstrap.ps1 with admin rights
- [x] Run AnomalyHunter & AnomalyDetector scans
- [x] Validate operator handshake via .ghost.cfg signature

### [OK] Infection Phase

- [x] GhostResidency memory mapping
- [x] Deploy Polymorph variants if needed
- [x] Inject GhostKey via WraithTap
- [x] Activate Wormhole Protocol if required (operator gating)

### [OK] Exorcist / Cleanse Phase

- [x] Trigger ExorcistMode (Anoint, Bind, Cleanse) locally or in LinuxPDF
- [x] Log updates with GhostLogger
- [x] Confirm self-destruct if set

### [OK] Exit Strategy

- [x] Run SilentBloom.ps1
- [x] Securely wipe all residuals
- [x] Format USB or securely store final exfil data

Mission success depends on stealth and ephemeral footprints—For Raven.
