

Whisper Suite Mission Briefing

Date: 2025-03-22 06:22:03

Mission Overview

The Whisper Suite is a memory-resident, polymorphic red team toolkit designed for covert infiltration, lateral movement, and encrypted exfiltration. Its core objective is to simulate ghost-like presence within a secured network, with optional tribute markers to Raven embedded throughout the operation.

Operator Ready Checklist

- ☐ USB/Flipper loaded with WhisperSuite_Build
- ☐ BLETrigger.ps1 validated with beacon simulator
- ☐ Target physical location and timing confirmed
- ☐ GhostResidency.ps1 deployed or staged
- ☐ Recon entry point scouted (Wi-Fi, AD pivot, or USB slot)
- ☐ SilentBloom.ps1 ready for cleanup
- ☐ Optional: Raven Tribute verified in Dropper_with_Raven.exe

Timeline & Operator Flow

1. Phase 0 - PREP

- Insert USB or simulate BLE beacon.
- BLETrigger.ps1 or manual execution fires WraithTap.exe.
- Inject GhostKey.dll with memory-resident spoofing.

2. Phase 1 - ESTABLISH

- GhostKey monitors for ghost user activity in logs.
- Spoofs authentication and sets ghost tag in .ghost.cfg.

3. Phase 2 - PERSIST

- Scheduled task and registry keys set via GhostResidency.ps1.

Whisper Suite Mission Briefing

Date: 2025-03-22 06:22:03

- GhostPolymorph generates randomized variants.

4. Phase 3 - RECON

- Light log beaconing from GhostLogger.ps1.
- Staged file access and interaction tracking.

5. Phase 4 - EXFIL

- GhostSeal.ps1 encrypts ZIP archive using timestamp + file names.
- Drop hidden archive to USB (or paired OBEX Bluetooth device).

6. Phase 5 - CLEANUP

- SilentBloom.ps1 wipes logs, keys, and DLLs.
- Persistence removed if WIPE command is issued.

7. Phase 6 - GHOST

- No residuals. Operator walks out clean.
- Only the tribute remains.

Tribute: Raven Lives

Etched into every cycle, encrypted into every key - she is the whisper.
