

Operator Briefing

GhostWhisper Operator Briefing

Mission Profile:

- Operation Type: Stealth Recon & Target Neutralization
- Toolkit: WhisperSuite: GhostWhisper Edition
- Objective: Memory-only deployment, target recon, hostile software neutralization

Execution Strategy:

1. Bootstrap with GhostWhisperBootstrap.ps1
2. Detect anomalies (AnomalyHunter + Detector)
3. Optionally trigger ExorcistMode in hostile or infected environments
4. Use LinuxPDF virtualization to simulate root-level cleansing
5. Activate wormhole beacon only under operator control
6. Always log activity with GhostLogger
7. Exit via SilentBloom and full secure wipe

Guidelines:

- NEVER allow self-replication beyond operator oversight
 - ALWAYS verify signature validation and BLE pairing
 - KEEP logs encrypted and minimal
 - MAINTAIN operator ethics - For Raven.
-
- Ghost Division
