WHISPER SUITE -- OPERATOR MISSION BRIEF

OBJECTIVE:

- Deploy implant via USB or BLE to compromised target.

- Trigger logging, encryption, and exfil via remote .ghost.cfg.

- Retrieve encrypted archive via hidden drop.

FIELD CHECKLIST:

[ ] USB contains WhisperSuite_Build with LaunchGhost.ps1

[ ] Target machine is live and accessible

[ ] Shell.exe running (for injection)

[ ] Drop .ghost.cfg with COMMAND=LOG / SEAL / EXFIL

RED TEAM FLOW:

1. Launch LaunchGhost.ps1 from USB

2. Wait for command execution (up to 2 min)

3. Collect loot archive from hidden folder on RAVEN_USB

4. If needed, drop .ghost.cfg with COMMAND=WIPE to scrub

STAGE COMMANDS:

COMMAND=LOG   --> Begin ghost user file logging

COMMAND=SEAL   --> Encrypt logged file interactions

COMMAND=EXFIL   --> Archive + drop encrypted loot

COMMAND=WIPE   --> Remove all traces of operation
